

Hospice Provider Availability by State (CMS Care Compare)

Methodology version v2026.05.0 -- Generated 2026-05-26 01:13:06Z

Public methodology surface -- <https://fonteum.com/methodology/hospice-availability>

State-level rollups of CMS Care Compare hospice provider counts.

Source provenance

Source families: CMS Care Compare datasets (public)

Spatial resolution: Facility (point) + state rollups.

Temporal coverage: CMS quarterly Care Compare release (current snapshot 2026-04-01).

Refresh cadence: Quarterly (matches CMS Care Compare release cadence).

Snapshot: 5,300 providers across 51 states + DC, dated 2026-04-01.

Reproducibility

1. Pull the CMS Care Compare Hospice Compare dataset from data.cms.gov/provider-data/dataset/252m-zfp9.

2. Bucket by state.

3. Compute per-state count + provider-type breakdown.

Limitations

- Each CMS measure carries its own published limitations; readers should review the CMS dataset documentation linked in the methodology for measure-specific caveats. We do not modify CMS's published measure values, only re-aggregate to state-level rollups.

- Sampling-based measures (e.g. patient-experience surveys) carry confidence bands CMS publishes alongside the values. State-level rollups average across facilities and do not preserve those bands; for facility-specific decisions, reference the original CMS Care Compare record.

- Date alignment: state rollups are computed from the CMS file's published reporting period, not the file release date. The reporting period typically lags the release date by 6-12 months per CMS convention.

Field schema

> provider_ccn -- CMS Certification Number for the hospice provider.

Source: CMS Care Compare -- Hospice Compare (<https://data.cms.gov/provider-data/dataset/252m-zfp9>)

Refresh: Quarterly - Confidence: 1.0 (verbatim)

> state -- Hospice state (USPS code).

Source: CMS Care Compare -- Hospice Compare (<https://data.cms.gov/provider-data/dataset/252m-zfp9>)

Refresh: Quarterly - Confidence: 1.0 (verbatim)

> provider_type -- Hospice provider type (free-standing, hospital-based, home-health-based, etc.).

Source: CMS Care Compare -- Hospice Compare (<https://data.cms.gov/provider-data/dataset/252m-zfp9>)

Refresh: Quarterly - Confidence: 1.0 (verbatim)
